

Ready your search. Run it with discipline. Convert the right offer.

A senior search system for your next move.

MissFit Mindset helps executives move with clarity, sharper positioning, targeted execution, and high-stakes interview and offer support.

Simple to choose. Built around your reality.

Quietly exploring, actively looking, or somewhere in between — the work is configured to your visibility, urgency, and risk.

HOW WE HELP

01 · FOUNDATION

Search Readiness

Clarify the target, sharpen the story, and prepare the materials the market needs to see.

02 · SEARCH

Search Campaign

Find the right opportunities, manage applications and access, track the pipeline, and adjust from market signal.

03 · CONVERSION

Interview & Offer Advisory

Show up clearly in high-stakes conversations, evaluate offers, and negotiate well.

A transition is not a second full-time job. We help you run it like a campaign.

Choose where you are in the search.

Each option is built around a specific moment in the executive transition — readiness, active search, or conversion.

FOUNDATION

Search Readiness

For clarity and stronger materials.

We define where you should compete and build the story the market needs to see.

North Star Strategy

Target role lane, market lane, compensation lane, positioning thesis, risks, and roadmap.

Market-Ready Build

Executive résumé, LinkedIn refresh, proof points, recruiter intro, and interview story foundation.

MANAGED SEARCH

Search Campaign

For running the search with structure.

Visibility, application support, recruiter access, networking, and market intelligence — managed end to end.

Campaign Lite

For selective or quietly active searches that need structure, role discovery, and market calibration.

Campaign Premier

For active searches that need stronger execution, recruiter activation, and faster feedback loops.

CONVERSION

Interview & Offer Advisory

For active interviews or offers.

Show up clearly, answer hard questions, evaluate the opportunity, and protect your value.

Interview Support

Story, examples, objections, executive presence, compensation language, and follow-up notes.

Offer Support

Offer review, scope and title risk, negotiation strategy, counter language, and decision support.

Each engagement is scoped to urgency, seniority, search complexity, and confidentiality.

Your campaign fits your situation.

Two support levels and three campaign postures. Level sets execution depth; posture sets how the campaign behaves in market.

CAMPAIGN LITE

For selective or quietly active searches.

Structured search support, role discovery, application support, pipeline visibility, and market calibration.

CAMPAIGN PREMIER

For active searches that need more execution.

Higher-intensity sourcing, application support, recruiter activation, networking support, follow-up, and signal review.

HOW TO CHOOSE

Lite fits quieter searches with limited bandwidth. **Premier** fits higher-urgency searches that need more applications, recruiter access, and active execution.

CAMPAIGN POSTURE How the campaign behaves in market — confidential, active, or hybrid.

CONFIDENTIAL

For employed or exposure-sensitive executives.

Selective opportunities, discreet recruiter paths, warm introductions, and careful management of visibility.

ACTIVE

For executives who need traction now.

Consistent role discovery, fit-scored applications, follow-up, recruiter activation, and faster market feedback.

HYBRID

For serious but selective candidates.

Targeted applications, selective recruiter and network activation, and channel-by-channel adjustment.

WHAT THE CAMPAIGN CAN INCLUDE

Opportunity Slate

Curated roles and target companies worth pursuing now.

Source Map

Job boards, company sites, niche and executive boards, recruiter channels, and hidden-market sources.

Application Support

Role selection, tailoring, preparation, submission support, and tracker updates.

Application QA

Fit, résumé version, positioning, screening answers, and tracker accuracy.

Recruiter Gateway

Targeted recruiter and search-partner outreach, warm-path review, and follow-up.

Networking Support

Target contacts, referral paths, messaging, conversation prep, and follow-up.

Pipeline Tracker

Applications, outreach, recruiter activity, interviews, owners, and next actions.

Signal Review

Diagnosis of market response, conversion gaps, role fit, and target calibration.

A clear rhythm, not a vague promise.

You will know what is happening, what is pending, what we are learning, and where your judgment is needed.

Search Readiness

Strategy and market-ready materials.

Strategy

Target lane, market lane, compensation, risks, roadmap.

Materials

Résumé, LinkedIn, proof points, recruiter intro, story base.

Search Campaign

Ongoing managed search.

Execution

Roles, applications, sources, recruiter access, networking.

Intelligence

Tracker, Signal Review, follow-up, target calibration.

Interview & Offer Advisory

High-stakes conversion support.

Interview

Story, objections, examples, compensation language.

Offer

Review, negotiation, scope and title risk, decision support.

STRATEGIC SUPPORT

Campaign kickoff

Included at Search Campaign start.

Strategy review

Included based on campaign level and need.

Interview prep

Included when scoped or triggered by active interviews.

Additional advisory

Available when a decision, interview, or offer requires deeper support.

SEARCH RHYTHM

Search meeting

Cadence depends on Lite or Premier support and campaign posture.

Written update

Weekly summary of activity, status, and next actions.

Signal Review

Regular review of market signal and what should change.

Offer strategy

Included through Interview & Offer Advisory or higher-intensity campaigns.

MissFit Mindset provides the structure, judgment, and execution that keeps the search focused, visible, and responsive to the market.
